

Genus *Trillium* in the Garden

Presented by Brian F Jorg

Class Series: Gardening with Natives

Class Length: 1 hour

Class Type: PowerPoint Presentation

Class Description:

Perhaps there is no more iconic wildflower than our native trillium species. However, large scale commercial propagation is still not available. In this presentation will discuss new and exciting developments in trillium propagation which will make this genus more accessible and available to home gardeners. We will also discuss which trilliums are best suited for the garden, such as *Trillium cuneatum*, Sweet Betsey and *Trillium vaseyii* hybrids-which are naturally occurring hybrids. Participants will walk away with information needed to grow and maintain the hardy perennial trillium for your garden.

Brian Jorg, Cincinnati nature photographer, public speaker, and horticulturist, travels the world to capture the beauty of nature in photographic images. Brian also teaches many seminars, workshops, and classes in Cincinnati and around the region.
