

Bulbs for Color in the Landscape

Presented by Brian F Jorg

Class Series: Horticulture / Gardening

Class Length: 1 hour

Class Type: PowerPoint Presentation

Class Description:

Extend the 'color' season in your garden simply by integrating bulbs in your planting plan. Imagine looking out the window to find bright yellow winter aconite pushing through a February snowfall and shortly there after, the royal blue squill heralding the explosion of spring color due in March and April. Whether as mass plantings in formal beds or naturalizing them throughout your lawn-any size garden will benefit from bulbs.

Brian Jorg, Cincinnati nature photographer, public speaker, and horticulturist, travels the world to capture the beauty of nature in photographic images. Brian also teaches many seminars, workshops, and classes in Cincinnati and around the region. To schedule an event with Brian or for a complete list of available classes, presentations and workshops please visit our website,
