

# Hardy Trees and Shrubs for Tough Sites

Presented by Brian F Jorg

Class Series: Horticulture / Gardening

**Class Length: 1 hour**

**Class Type: PowerPoint Presentation**

## Class Description:

Most gardens have areas where it is tough to grow plants. Whether it is too dry, too wet, or composed of poor, compacted soil, this presentation will cover the plants best suited for tough sites. Find out which plants can survive heavy, compacted clay soils or which plants will thrive in dry locations. This class will help extend your plant palette to include tough trees and shrubs for tough sites.

Brian Jorg, Cincinnati nature photographer, public speaker, and horticulturist, travels the world to capture the beauty of nature in photographic images. Brian also teaches many seminars, workshops, and classes in Cincinnati and around the region. To schedule an event with Brian or for a complete list of available classes, presentations and workshops please visit our website,
