

Wildflowers of the Great Smoky Mountains

Presented by Brian F Jorg

Class Series: Native Flora

Class Length: 1 hour

Class Type: PowerPoint Presentation

Class Description:

The southern Appalachian Mountains contain the greatest plant diversity in North America. The Great Smoky Mountains National Park is located in the middle of this diverse region. Join us as we explore the rich flora that make up the complex eco-system of the southern Appalachians. See the great wildflower displays, lady-slipper orchids and a number of trillium species. Experience dwarf crested iris, fringed phacelia, and towering tulip trees. We will also explore some of the native fauna that exists in this rich eco-system. This class will show you the rich diversity that is the Great Smoky Mountains National Park.

Brian Jorg, Cincinnati nature photographer, public speaker, and horticulturist, travels the world to capture the beauty of nature in photographic images. Brian also teaches many seminars, workshops, and classes in Cincinnati and around the region.
